

BTS TremoloDelay V1.0

Tempo Selector:

BPM/FINE: Sets the tempo
HOST: Syncs to host or set tempo manually (host/man)

LFO:

SPD: sets the LFO speed when not in sync
SYNC: syncs the LFO to the selected tempo
1/8: sets the LFO speed when synced (1/16, 1/8, 1/4, 2/4, 3/4, 4/4, 8/4, 16/4)
ON: turns the tremolo on/off
SIN: sets the LFO waveform (sine, saw, triangle, square)
x10: multiplies the LFO speed

MIX:

MIX: sets the balance between dry signal and tremolo signal
WET: bypasses the mix knob; only the tremolo signal passes through.

Preset Manager/Delay:

“Demo”: name of the currently selected Preset; click to open the preset list
NAME: sets the name of the preset
FILE: opens the file menu (load/save, etc.)
PROT: sets write protection
SIG: xxx: displays the signature of the current song (depends on the host's settings)
“120 BPM”: displays the current tempo (if the tempo selector is set to “MAN” it displays the manually selected tempo, otherwise host's tempo)
+/-: preset switcher (up/down)
FB: sets the delay feedback
Note: sets the delay length
DEL (knob): sets the delay level (mix dry/wet)
DEL (switch): turns the delay on/off
